

Architectural Engineers Collaborative and Way Consulting Engineers have established AEC-WAY to provide structural engineering services for significant public projects. AEC-WAY will enable talented engineers of the Member firms to provide exceptional service to Owners, Architects and Contractors working in the public realm. We are an Asian-owned minority business enterprise certified as HUB by the State of Texas, MBE and DBE by the City of Austin, as well as SBE/MBE through the South Central Texas Regional Certification Agency.

**Way Atmadja, P.E.**  
Managing Principal

**Charles Naeve, P.E.**  
Principal

Way Atmadja and Chuck Naeve, Managing Principals of Way Engineering Consultants and AEC, share the philosophy that thoughtful and beautiful architecture is enhanced by equally considered structural engineering. There is a unique structure appropriate for every building. Solving the structure, sometimes aesthetically, always economically, often uniquely is where we excel.
