

SERVICE | QUALITY | INTEGRITY | SUSTAINABILITY

From manufacturing to distribution, our goal is to integrate practical solutions with new technology. Through close collaboration, we utilize time tested tools to create efficient and functional buildings. Whether renovating or creating a brand-new facility, DBR applies 50+ years of experience to create solutions that are safe and operationally excellent.

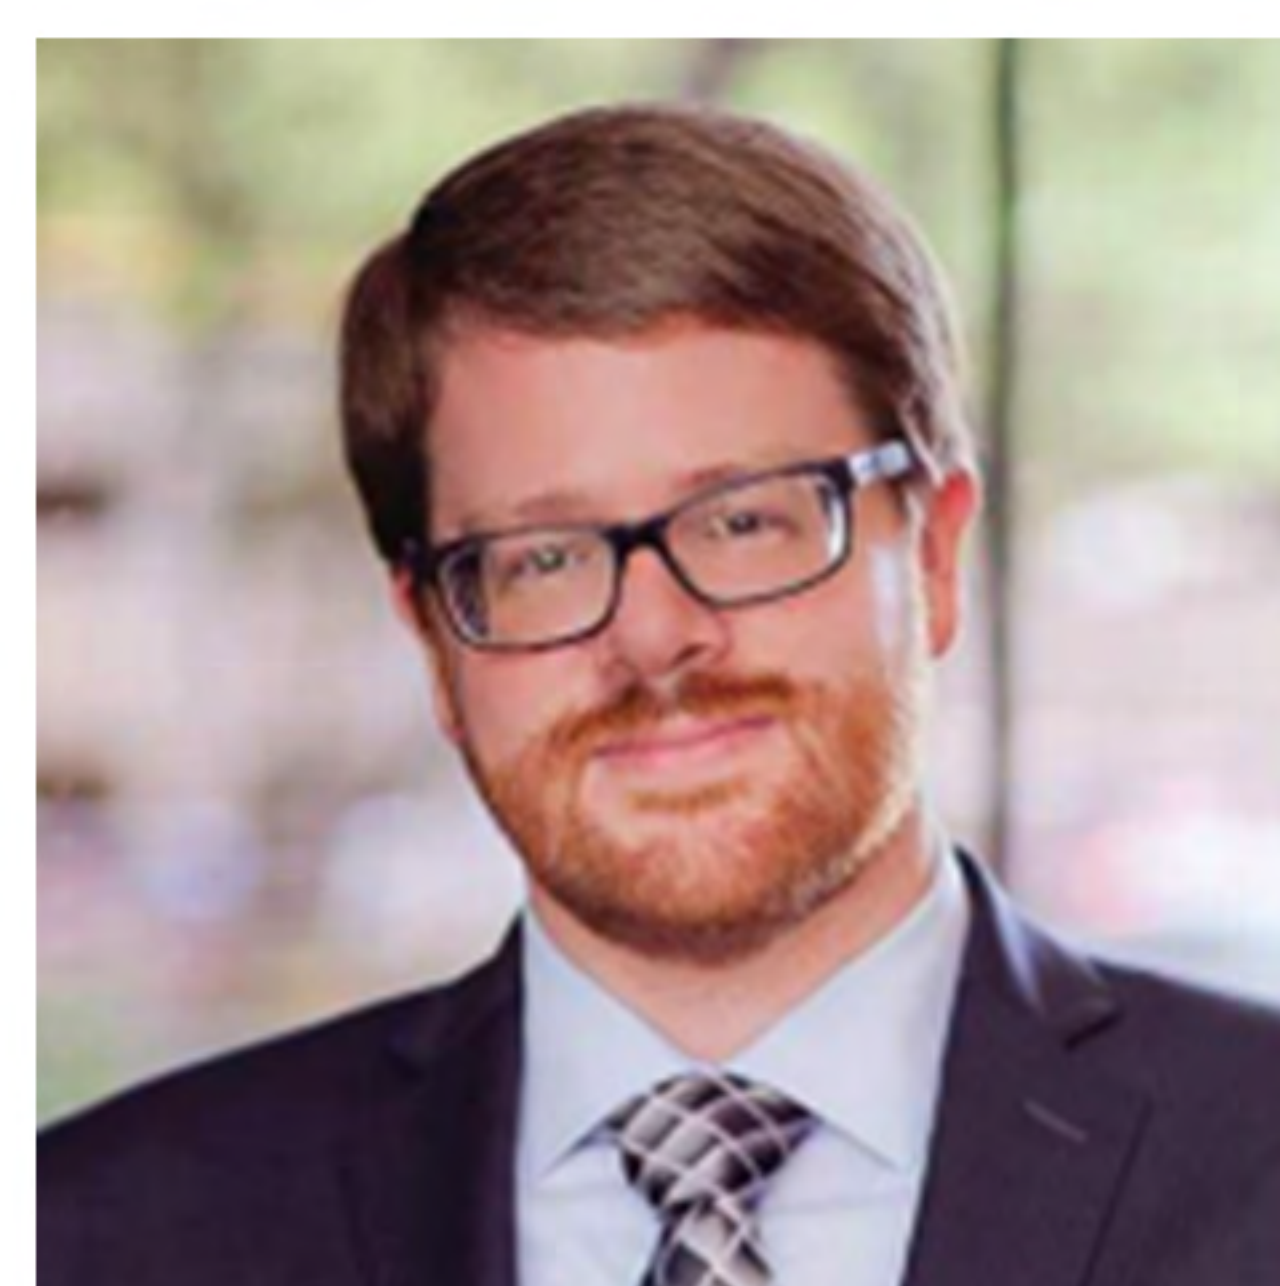

Representative Clients

Brian S. Jenkins
President | COO

As Partner in Charge, Brian will act as supervisor of the project on a 'big picture' scale- helping to guide workloads and project schedules, to insure the timely delivery of your quality designs. He will be available every turn, to answer questions, to solve problems and smooth ruffled feathers, and to relay any and all pertinent information to the Project Manager and team.

Will Meister, P.E.
Partner

Will is responsible for the coordination of mechanical, electrical, and plumbing systems for projects. He has engineered educational facilities, tenant interiors in various mid and high rise office buildings, industrial facilities, financial institutions, and municipal facilities. Will's design prowess even extends to the application of design function, making him well-versed in load calculations, equipment sizing and selection, and field site surveys of existing buildings.
